

‘Winning With Numbers improves outcomes!’

How do you use Winning With Numbers?

We have a Winning With Numbers session for ten minutes at the start of every maths lesson. We also use the programme for children who need support with filling gaps that have previously been created.

How has Winning With Numbers impacted on pupils?

The children love Winning With Numbers every day. They like the structure and benefit from the routine. It is clearly obvious that learning is sticking during the teaching of the programme and through their outcomes. Maths outcomes have improved. Giving children daily exposure to the Winning With Numbers has certainly played a huge part in this. Now that Winning With Numbers is embedded in daily lessons children are more confident and fluent. The small step curriculum really helps all children succeed.

How has Winning With Numbers impacted on staff?

Staff benefit from the Winning With Numbers routine and have embedded this well into lesson. They have developed their subject knowledge and ensure they understand what each WIN is about. During a recent internet drop out staff were still able to teach the WIN because of the journey they were familiar with and they knew exactly where children were on that journey and what part of the Winning With Numbers programme to cover.

How has Winning With Numbers impacted on parents?

We delivered a Winning With Numbers workshop to parents so we could show them the programme. We sent letters to parents with the Winning With Numbers explanation video. There are lots of resources and videos to support parents in helping their child at home and build confidence themselves. Parents have been enthusiastic and report that their child much prefers this style of homework, and it helps them feel more confident.

Final Winning Thought!

Winning With Numbers has added a consistent structure and approach across the school. Inspectors observed Winning With Numbers in a recent inspection and the maths deep dive went well!
