

## ‘WWN offers support just at the right moment!’

### How do you use Winning With Numbers?

We use Winning With Numbers in all our classes. Each class use the small step curriculum to choose the best starting point/WIN for them and then they move through the program. Thinking of it as like phonics for maths has been a gamechanger.

### How has Winning With Numbers impacted on pupils?

Our independent learners are loving the system. A very able child thrives on the program because it allows autonomy and self-led learning. She can become emotionally dysregulated when stuck but seems relaxed in the knowledge that the system will always offer teaching and support at just the right moment for progress to be made.

### How has Winning With Numbers impacted on staff?

All staff are very positive about Winning With Numbers. Staff have benefited from the inbuilt retrieval practice which is useful to identify and address previous gaps in learning. Winning With Numbers allows staff to use a ‘Remind Me’ button which provides specific support at the actual point of difficulty. The ‘Remind Me’ button is an excellent feature of the programme.

### How has Winning With Numbers impacted on parents?

Parents are highly engaged in Winning With Numbers and are supporting their child’s learning at home. They are able to do this easily through accessing the Winning With Numbers platform at home ensuring pupils make maximum progress.

### Final Winning Thought!

Winning With Numbers was exactly what we needed at our school!
